

# Individual Website Design and Development Project

**Due Date: Week Seven at midnight**

## Project Brief

You are required to develop either a personal website or project of your choice.

## Submission of Assignment

The following items are required in order to consider the project submitted:

- The URL for the deployed site. The site should only be deployed to Netlify.
- The URL for the github.com repository.
- The URL for mockups

## Instructions

- Research **at least five (5)** websites to garner inspiration for your project.
- Develop **at least two (2) unique** mockups for the website
- Select
  - The best color scheme that represents the specific emotion you intend to invoke in potential users visiting the website. If the color scheme is not chosen from a color palette engine/website, the type of color scheme selected must be identified and clearly explained.
  - The best engaging, high quality images and videos that will enhance the design of the website
  - An appropriate font/typeface that matches the purpose of the site
- Develop the website from the selected mockup using HTML and CSS

- Deploy the website such that users can interact and provide valuable feedback

## Pages

The project must contain a **minimum four (4) pages**. A Home, Contact page and 404 error page must be included in the minimum required pages. Each page should include a footer.

## Logo Creation & Favicon

A logo must be created for the design and the favicon implemented.

## Mark Scheme

Item	Marks Allotted
List of sites researched	10
Deployment of website	10
Design and development of four pages	80
URL provided for mockup	20
Site renders with no errors in console or browser window (i.e. no broken images or improper inclusion of .css files)	50
Prescribed folder structure seen	10
Use of lowercase names for files and folders	10
Folders contain the correct file type	10
Font/typeface selection	10
Logo creation	20
Favicon implemented	10
Color palette selection	20

Total Marks	260
-------------	-----

## Notes

- Each student must submit a short description of the idea by **Week Five of the course.**
- Lorem ipsum text **should not be found in the final website.**
- No **CSS frameworks or other libraries** should be used to develop the design. If found in the source code, there will be **no grade awarded for the assignment.** Additionally, only **external CSS files** should be used.
- Plagiarism of code is not allowed and if found, there will be **no grade awarded for the assignment.**
- No email submissions will be accepted.
- Please note the deadline of the project as **no marks will be awarded** if the assignment is submitted after the due date and time.
